SUMMARY

- I enjoy a challenge, however not an impossible one. I search for opportunities to gain knowledge on topics I would like to know more about. Due to my relaxed demeanor and attitude, I am an easy member to get along with in a group. Being a curious person, I do whatever it takes to make sure my work is completed in a timely fashion; however I will explore different paths along the way. My career ambition is to develop video games and enjoy the job.
